Screening

Selection

Preclinical/Clinical trials

Manufacturing

## *DSC-specific information*

Thermal stability and aggregation studies

## *ITC -specific information*

Thermodynamics  
Stoichiometry

## *SPR -specific information*

Kinetics and transition state thermodynamics  
Epitope mapping and Antibody isotyping

Concentration  
Immune response characterization

## *Common applications*

Binding analysis and affinity  
Protein specificity and confirmation of 1:1 binding  
Structure function relationship

# Stability Study
