

Company

- Oval Medical Technologies Ltd. Founded in 2009, based in Cambridge, UK.
- Designs, develops and manufactures novel injection devices
- Technology led company with products ideal for viscous biologics
- Team comprised of world leading injection device experts
- Financially secure
 - Aptar Group plc is a major shareholder

Devices

- High viscosity cyclic olefin primary drug containers
- Reduced contamination: no silicone, rubber, tungsten or glass
- Standard device delivers solutions of up to 250cP through a 25G thin wall needle in 10 seconds
- Specialist device used in a successful PK study in dogs with a 250,000 cP non-newtonian formulation vs manual injection
- Can deliver higher volumes up to 5 mL
- Oval's devices are preferred and easier to use
- Robust designs provide reliable and consistent performance
